

```
class AddTwo {  
    public static void main(String[] args) {  
        //user iserting two ints num1,num2  
        int num1 = Integer.parseInt(args[0]);  
        int num2 = Integer.parseInt(args[1]);  
  
        //defining sum as num1 + num 2  
        int sum = num1 + num2;  
  
        //printing num1 + num2 = the sum of num1 and num 2  
        System.out.println(num1 + " + " + num2 + " = " + sum);  
    }  
}
```
